

Final Project Discussion

Meeting 11/21

Attendance: Colin, Jamie, Josh

- By the presentation date (12/3/24) have all primary functionalities completed
- Jamie has worked with selenium (download chrome driver)
- Josh needs to get database working, has committed to getting it completed by next meeting
- Might be pivoting the application functionality away from saving app data and just auto filling as saving the app data seems redundant as most websites keeps the app data and progress

Hamzeh: Missing again
