

Final Project Discussion

Meeting 11/11

- **chrome://extensions/ -> Dev Mode** to access extensions build environment
- When need the extension to work with multiple websites
 - test 1 at first, get that to work
<https://jobs.lever.co/wealthfront/d410ac37-d5ce-4b3b-9e71-fef664db8aaf/apply>
- What needs to be done/learned by next meeting **(11/14) BY 9PM**
 - Learn about github: pull req., push req., branches, commits, etc
 - Learn about Chrome Extension Dev Mode
 - Can it work well with the Github?
 - What database will we use? Options? How does it function?
- Should take at least 2-3 hours, hour a day until Thursday for pacing

Github don't's:

- DO NOT commit directly to *main*
